**MARINE SCIENCE (MSCI)**

**MSCI Courses**

**MSCI 100. Introduction to Marine Sciences. 1 unit**  
CR/NC  
Prerequisite: Marine Sciences major.

Introduction to Marine Sciences faculty, the Biology Department and campus resources, research opportunities, possible careers, studying science, and current topics in marine sciences. Credit/No credit grading only. 1 lecture.

**MSCI 111. Introduction to Marine Biology. 4 units**  
2020-21 or later catalog: GE Area B2  
2019-20 or earlier catalog: GE Area B2

Introduction to marine organisms and their adaptations to the ocean. Focus on select marine ecosystems including coastal ecosystems. Interaction between humans and the sea. Topics include effects of ocean acidification and pollution, climate change, and loss of marine biodiversity. Not open for major credit in Biological Sciences, Microbiology, or Marine Sciences. 4 lectures. Fulfills GE Area B2.

**MSCI 300. Marine Ecology. 4 units**  
Prerequisite: BIO 160, BIO 162, and BIO 263. Recommended: STAT 218.

Introduction to the functional biology of marine plants and animals and the ecological processes that underlie their distribution and abundance in open oceans, coastal regions, and estuaries. Field trips required. 2 lectures, 2 laboratories. Formerly MSCI 328.

**MSCI 301. Biological Oceanography. 3 units**  
Prerequisite: BIO 160; BIO 161; BIO 263; CHEM 129; and STAT 218.

Interdisciplinary study of marine organisms, how they interact with each other and their physical, chemical and geological environment. Emphasis on how these interactions impact abundance, diversity and temporal and spatial distributions. 3 lectures.

**MSCI 307. World Aquaculture: Applications, Methodologies and Trends. 4 units**  
2020-21 or later: Upper-Div GE Area B  
2019-20 catalog: GE Area B7  
2017-19 or earlier catalog: GE Area F

Life histories and habitats of important species of fishes, invertebrates and algae. Methodologies for the commercial propagation of specific forms. Global and regional coverage, including socioeconomic trends, controversies and applications in developed and less developed regions of the world. Not open for major credit in Biological Sciences. 3 lectures, 1 activity. Fulfills GE Upper-Division B (GE Area B7 for students on the 2019-20 catalog; GE Area F for students on earlier catalogs).

**MSCI 324. Marine Mammals, Birds and Reptiles. 4 units**  
Prerequisite: BIO 162; BIO 263; and STAT 218.

Introduction to the biology, ecology and evolution of mammals, reptiles and birds of the marine environment, with an emphasis on Central California species, diversity patterns, evolutionary relationships, adaptations to the ocean, and conservation issues. Field trip required. 2 lectures, 2 laboratories.

**MSCI 330. Technologies for Ocean Discovery. 4 units**  
2020-21 or later: Upper-Div GE Area B  
2019-20 catalog: GE Area B7  
2017-19 or earlier catalog: GE Area F

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Survey of ocean sensor systems, sensor platforms, and other emerging technologies that provide new understanding of the ocean, current issues in marine science, and the social context and societal implications of discoveries in ocean sciences. Course projects could include presentations, data analysis, and hands-on design of sensors. Field trip required. 3 lectures, 1 activity. Fulfills GE Upper-Division B (GE Area B7 for students on the 2019-20 catalog; GE Area F for students on earlier catalogs).

**MSCI 340. Scientific Diving. 3 units**  
Prerequisite: CHEM 302; MSCI 301; MSCI 328; Junior standing and consent of instructor.

Advanced training in scientific methods associated with practical training in scuba diving. Satisfies American Academy of Underwater Sciences standards. Combination of theory, techniques and scuba diving. Experience collecting data and handling scientific equipment underwater. AAUS certification will require additional assessments outside of class. Field trips and additional fee required. 1 lecture, 2 labs.
MSCI 428. Marine Conservation and Policy. 4 units
Prerequisite: BIO 160 and BIO 263; and BIO 327 or BIO 363 or BIO 401
or BOT 326 or MSCI 328; or Graduate standing in Biological Sciences.
Recommended: PSC 201.

Examination of how science and policy are used to evaluate and
implement marine conservation and resource management. Topics
include endangered species, fisheries, climate change, marine protected
areas, research and conservation topics and developing policy for
management decision-making. Field trip required. 3 lectures, 1 laboratory.

MSCI 437. Marine Botany. 4 units
Prerequisite: Junior standing and BIO 162.

Comprehensive examination of the ecology, life histories, functional
morphology, physiology, and taxonomy of marine algae and marine
plants. Laboratory emphasizes species endemic to the central coast of
California. 3 lectures, 1 laboratory.

MSCI 438. Aquaculture. 4 units
Prerequisite: BIO 160, BIO 162, and BIO 263.

Propagation and rearing of fishes, invertebrates and algae from marine,
freshwater, and estuarine habitats. Current methodologies and general
life histories. Global perspective including aquacultural development in
developed and developing countries. 3 lectures, 1 laboratory.

MSCI 439. Fisheries Science and Resource Management. 4 units
Prerequisite: BIO 162. Recommended: BIO 322.

Scientific investigation of marine and freshwater fisheries. Methodologies
and quantitative strategies for study of finfish and invertebrates. Role of
oceanographic or limnological processes on stock maintenance. Impact
of human exploitation on maintenance of sustainable yields, including
user-group conflict issues, and regional/global controversies. Lab/field
protocols, basic fisheries statistical procedures, molecular methods,
computer simulations. 3 lectures, 1 laboratory.

MSCI 440. Communicating Ocean Sciences to Informal Audiences. 3
units
Prerequisite: Junior standing; BIO 322, BIO 336, MSCI 300, MSCI 328, or
PSC 201; completion of GE Area A with grades of C- or better; and GE
Area B2 or BIO 211.

Simultaneous focus on developing a knowledge of ocean sciences
and the advanced educational approaches for communicating that
knowledge. Teaching skills developed through coursework, outreach
events and design of collaborative projects at museums and aquariums.
Primary objective is to learn how to present ocean-themed hands-on,
inquiry-based science exhibits, in order to improve the scientific literacy
of audiences of all ages. Field trip required. 1 lecture, 2 activities.
