The department offers the Plant Sciences major leading to the Bachelor of Science degree. Within this major are three concentrations: Environmental Horticultural Science, Fruit and Crop Science, and Plant Protection Science. Each concentration is well-grounded in the sciences and designed to prepare students for many attractive career opportunities.

Experiential Learning Opportunities and Facilities

The Plant Sciences Department has well-equipped laboratories for instruction in plant biotechnology, insect and weed pest management, postharvest technology, plant production, and landscape horticulture, including CAD capabilities and plant materials.

Students have hands-on experiences in the production and marketing of landscape and ornamental plants using comprehensive facilities at the 16-acre Environmental Horticulture Unit. This unit includes 35,000 square feet of greenhouses, a 5,000 square-foot retractable roof greenhouse, 7,500 square feet of shade houses, an extensive field container growing area, and a five-acre arboretum. Additionally, there are six horticulture laboratories. The Leaning Pine Arboretum and Gardens is an outdoor teaching laboratory while the 200 acres of landscaped campus are planted with many interesting and unusual trees and shrubs from all over the world, as well as California natives.

The Crops Unit has 70 acres of productive citrus, avocados, grapes, deciduous fruit trees, and berries, with additional nonbearing acreage for instructional use. There are approximately 35 acres of annual vegetable and forage crops, of which eleven acres are certified for organic production. There is a modern building containing two teaching labs with prep rooms, two greenhouses, coolers, a hydroponic vegetable production facility and a state-of-the-art fruit and vegetable processing line.

The technological aspects of instruction are enhanced by an array of equipment required in crop and fruit production systems, postharvest handling, biotechnology, seed processing, pesticide application, nursery and greenhouse operation, and landscape construction. Field trips supplement instruction and are encouraged for many classes.

Students are encouraged to gain experience participating in the Enterprise project program or by working on the Department’s production units. Enterprise projects are run under faculty supervision but are student operated. These projects provide students with a “no risk” glimpse of a commercial plant production. The Department offers Enterprise projects in the production of vegetables, citrus, avocados, deciduous fruit and nut crops, floricultural crops, nursery plants, and forages. Available marketing outlets range from contract sales of vegetable seeds, wholesaling to area supermarkets, and direct marketing at local farmers’ markets, garden centers, florist shops, and through campus outlets. Certified organic produce is marketed through weekly Farmers’ Markets or is sold to local restaurants and retailers.

The Department supports co-curricular activities for its students, including two student clubs: the Crops Club and the Horticulture Club. Student teams in flower judging, floral design and the landscape industry continue to place or win at national championships.

Undergraduate Programs

BS Plant Sciences

The Plant Sciences Department at Cal Poly offers students an opportunity not just to learn, but to learn-by-doing. Our students benefit from a broad spectrum of opportunities ranging from hands-on experiences in our fields, groves, nurseries, and greenhouses to real world application through internships and other collaborations with our industry partners. We also excel in providing a foundational plant science background and instilling a passion for plants, as we produce the next generation of leaders in the agricultural and environmental plant sciences.

Students in this major begin with core courses that provide a thorough introduction to the various concentrations. Each concentration, in turn, has required courses, which may be shared by other concentrations. In their first year, students explore curricular and professional opportunities to enable them to choose a concentration. In consultation with professional and faculty advisors, students have the flexibility to select electives within the concentrations according to their career goals and interests.

Internships are readily available to students and are highly recommended. Interns are typically placed with private industry and public facilities all across the United States but may also take place in foreign countries.

Over $100,000 in scholarships are available to students as are several undergraduate student assistantships which are sponsored by industry.

Program alumni are employed nationally and internationally and are often leaders in their industries. Graduates of the department are in great demand. Typically there are more internship and job opportunities than there are students to fill them.

Concentrations

Each concentration offers introductory, intermediate and advanced classes. The concentrations offer their own course of study (including required courses and electives) as well as opportunities for cross-training and multi-disciplinary learning.

Environmental Horticultural Science

This concentration offers students a comprehensive preparation for positions in the nursery, turf, greenhouse, landscape, and floriculture industries, including public horticulture. Graduates are employed as business owners, growers, managers, researchers, educators, arboretum and botanical garden directors, landscape contractors and designers, landscape management professionals, pest control advisors, and park, sports field and golf course superintendents. The curriculum stresses production and marketing of nursery plants, fresh flowers, and flowering and foliage plants, landscape contracting, design, installation...
and management, turf installation and management, integrated pest management, and horticultural education, native plant restoration, green roofs and walls, and the public display of plants.

**Fruit and Crop Science**

The Fruit and Crop Science concentration provides students with detailed knowledge of the production of tree fruits and nuts, grapes, small fruits, vegetables and other row crops, and forages. The concentration details factors influencing the growth, development, and productivity of these crops (e.g., site selection, cultivar selection, field and plant establishment, pest management, harvesting, and postharvest handling). The concentration also focuses on ongoing and newly emerging specialty industries and concerns such as beekeeping, postharvest technology, plant breeding and biotechnology, integrated pest management, and precision agriculture.

**Plant Protection Science**

Approximately one-third of the world’s food crops are destroyed each year by insects, rodents, diseases and other pests. Finding ways to reduce these losses is the challenge of the plant protection specialist. In this concentration, students learn a broad range of pest management subjects including entomology, plant pathology, weed control and integrated pest management. Students develop an understanding of crop production principles, ecology, biotechnology, pesticide toxicology and environmental science. As environmental regulations continue to increase, employment opportunities will grow for those holding professional licenses, and this concentration prepares students to take the California Pest Control Advisor (PCA) and Certified Crop Advisor (CCA) license exams.

**Crop Science Minor**

Designed for students majoring in related academic disciplines who desire careers in crop production or its associated industries. The minor offers a broad-based knowledge of the science and technology of agronomy and vegetable production, especially as practiced in California. Not open to Plant Sciences majors concentrating in Fruit and Crop Science or Plant Protection Science.

**Fruit Science Minor**

The minor is designed for students majoring in related academic disciplines who desire to seek careers in fruit production or its associated industries. The minor offers a broad-based knowledge of the science and technology of fruit and nut production. Not open to Plant Sciences majors concentrating in Fruit and Crop Science or Plant Protection Science.

**Landscape Horticulture Minor**

The minor provides students with an understanding of the landscape horticultural industry and provides basic skills to understand the design, installation, and maintenance of landscapes. Students develop a knowledge of landscape plants and plant care as well as the basics of landscape contracting, including construction processes and materials used in the landscape industry. Students may learn advanced skills and concepts in the areas of turfgrass for golf course/sports field applications, design/build, plant care and arboriculture. Not open to Plant Sciences majors concentrating in Environmental Horticultural Science.

**Plant Protection Minor**

This program emphasizes both plant protection and plant production. Within the plant protection field of study, the student is exposed to a broad range of pest management subjects including entomology, plant pathology, and weed control. Within the production area the student may emphasize fruit production, crop production, ornamental horticulture, or natural resource management. Not open to Plant Sciences majors.

**Interdisciplinary Minors**

The department participates in offering interdisciplinary minors in Geographic Information Systems for Agriculture, Land Rehabilitation, and Sustainable Agriculture. Please see College of Agriculture, Food and Environmental Sciences (https://catalog.calpoly.edu/collegesandprograms/collegeofagriculturefoodenvironmentalsciences/) section for more information.

**Graduate Programs**

Cal Poly offers a Master of Science degree in Agriculture with specializations in Crop Science, Environmental Horticultural Science, and Plant Protection Science, among others. Please refer to the MS Agriculture (https://catalog.calpoly.edu/collegesandprograms/collegeofagriculturefoodenvironmentalsciences/#graduatetext) section of the College of Agriculture, Food and Environmental Sciences.

**PLSC Courses**

**PLSC 101. Orientation to Horticulture and Crop Science. 1 unit**

Term Typically Offered: F

CR/NC

Discussion of horticulture, field crop, and plant protection careers. Examination of Department’s curriculum, including its field, orchard and greenhouse operations. Introduction to student and professional organizations. Discussion of advising and academic resources. Required of all Horticulture and Crop Science students. Credit/No Credit grading only. 1 lecture. Formerly AEPS 101.

**PLSC 110. People, Pests and Plagues. 4 units**

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2
2019-20 or earlier catalog: GE Area B3
2019-20 or earlier catalog: GE Area B2
2019-20 or earlier catalog: GE Area B4

Introduction to the science of entomology, including insect identification, biology, ecology and evolution. Insects as beneficials, disease vectors and crop pests, and their interactions with humans, including roles in human culture and history. Not open for credit to Agricultural and Environmental Plant Sciences, Plant Sciences, or Wine and Viticulture majors (Viticulture concentration). 3 lectures, 1 activity. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs). Formerly AEPS 110.

**PLSC 120. Principles of Horticulture and Crop Science. 4 units**

Term Typically Offered: F, W

Introduction to horticulture and crop science. Basic plant processes, classification, anatomy, physiology, and biotechnology. Effect of environment on plants and how we control it. Introduction to plant growth including propagation, media, irrigation, nutrition, management, harvest, and post harvest handling. People’s use of plants. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 120.
PLSC 123. Landscape Installation and Maintenance. 4 units
Term Typically Offered: F
Prerequisite: PLSC 120.
Planting and maintenance of trees, shrubs, ground covers, perennial plantings, color beds, specialty plantings, and small turf areas. Site selection, cultural requirements, scheduling of maintenance activities, pruning, landscape renovation and irrigation system repair. Equipment operation, maintenance, and safety. Speakers from industry. 3 lectures, 1 laboratory. Formerly AEPS 123.

PLSC 124. Plant Propagation. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 120 and BOT 121.
Plant propagation practices with emphasis on understanding why practices are used, how they work, and how they are applied in commercial horticulture. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 124.

PLSC 126. Landscape Construction. 3 units
Term Typically Offered: TBD
Prerequisite: PLSC 120.
Design, construction techniques, and materials used in landscape and horticulture construction. Material quantity estimating, sustainable building practices, construction material substitutions, tools and equipment associated with landscape and horticulture construction, and equipment safety. Field trip required. 2 lectures, 1 laboratory. Formerly AEPS 126.

PLSC 127. Horticulture and Landscape Design. 4 units
Term Typically Offered: W
Aesthetic aspects of environmental horticulture, introduction to computer aided design, presentation techniques and garden history. Field trip required. 2 lectures, 2 laboratories. Formerly AEPS 127.

PLSC 132. Pomology I. 4 units
Term Typically Offered: W
Prerequisite: PLSC 120.
Orchard design and development, cultural practices, physiological responses of trees to cultural practices, propagation and strategies to maximize orchard profitability and sustainability. Not open to students with credit in AEPS 250. 3 lectures, 1 laboratory. Formerly AEPS 132.

PLSC 133. Pomology II. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 132.
Analysis of production and management strategies for major fruit and nut crops in California. 3 lectures, 1 laboratory. Formerly AEPS 133.

PLSC 150. Forage Crops. 4 units
Term Typically Offered: F
Forages as a world resource in food and animal production, soil and water conservation and sustainable agricultural systems. Forage use systems: pasture and range, green chop, silage, hay and cubes. Identification and management of limiting factors of forage plant growth. Botany of legumes and grasses. Grass, legume and weed identification. Forage crop improvement. Forage composition and quality. Antiquality factors. 3 lectures, 1 laboratory. Formerly AEPS 150.

PLSC 175. Beekeeping. 3 units
Term Typically Offered: F, SP
Studies and exercises in the handling of European honey bees with special reference to pollination of commercial crops. Honey processing and marketing. Hive inspection and disease detection. 2 lectures, 1 laboratory. Formerly AEPS 175.

PLSC 190. California Vegetable Production. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 120.
History, botany, growth characteristics and climatic adaptation, pests, and harvesting methods for the most important vegetable crops grown in California. Use of transplants, plastic mulches and row covers in vegetable production. Current topics in agriculture important to the vegetable industry. Field trip to a major California vegetable production area required. Survey of vegetable production for Plant Sciences majors. 3 lectures, 1 laboratory. Formerly AEPS 190.

PLSC 200. Special Problems for Undergraduates. 1-4 units
Term Typically Offered: FWSPSU
Prerequisite: Consent of instructor.
Individual investigation, research, studies, or surveys of selected problems. Total graduation credit limited to 4 units, with a maximum of 4 units per quarter. Report required. Formerly AEPS 200.

PLSC 203. Organic Enterprise Project. 2 units
Term Typically Offered: F, W, SP
CR/NC
Beginning field experience in production and marketing of organic vegetable crops. May include cultural practices, harvesting, processing, sales and marketing activities. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 203.

PLSC 205. Orchard and Vegetable Enterprise Project. 2 units
Term Typically Offered: F, W, SP
CR/NC
Sustainability Related
Hands-on experience in the production and marketing of fruit and vegetable crops such as blueberries, stone fruits, pomegranates, apples, citrus, avocados, broccoli, cauliflower, sweet corn, tomatoes, peppers, squash and lettuce. Students will also receive hands-on training in crop management. Not open to students with credit in AEPS 202 or AEPS 204. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 205.

PLSC 212. Environmental Horticulture Enterprise Project I. 2 units
Term Typically Offered: F, W, SP
CR/NC
Beginning field experience in environmental horticulture. Selection and completion of a management/production project. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 212.

PLSC 215. Floral Design I. 3 units
Term Typically Offered: F, W
Fundamentals of theory, techniques and skills currently practiced in the floral industry. Intended as consumer education for non-majors as well as initial preparation for pre-professionals. Includes applied art principles, post-harvest care and handling practices, and proper use of florist tools and materials in developing basic designs. 1 lecture, 2 laboratories. Formerly AEPS 215.
PLSC 225. Floral Design II. 3 units  
Term Typically Offered: SP  
Prerequisite: PLSC 215.  

Expanded exploration and application of design theory to commercial products and services in the retail floral industry. Appropriate utilization of current sales and business practices in a florist setting. Advanced techniques and skills for construction of designs for weddings, advanced arrangements, and designs for events. 1 lecture, 2 laboratories. Formerly AEPS 225.

PLSC 230. Environmental Horticulture. 4 units  
Term Typically Offered: TBD  
Technical information and recommendations for the residential horticulturist. Propagation, pruning, planting, media, fertilizers, pest and weed control, landscaping, maintenance, identification and care of ornamental plants. Being a wise horticultural consumer. Not open to Plant Sciences majors. 3 lectures, 1 laboratory. Formerly AEPS 230.

PLSC 232. Basic Viticulture. 4 units  
Term Typically Offered: F, W, SU  
Prerequisite: PLSC 120 or BOT 121; CHEM 127; and SS 120.  

Fundamentals of grape growing, with emphasis on wine grapes. Fundamentals of vine anatomy and physiology, development and phenology, trellising systems, soils, climatic factors, vineyard establishment, grafting, irrigation, fertility, harvest practices, pruning, major pests, and major varieties and rootstocks. Not open to students with credit in WVIT 231. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as PLSC 232/WVIT 233. Formerly AEPS 232/233.

PLSC 233. Plant Materials I. 4 units  
Term Typically Offered: SP  
Identification, habits of growth, cultural requirements, and use of ornamental plants in the landscape. 3 lectures, 1 laboratory. Formerly AEPS 233.

PLSC 234. Plant Materials II. 4 units  
Term Typically Offered: F  
Identification, habits of growth, cultural requirements, and use of ornamental plants in the landscape. 3 lectures, 1 laboratory. Formerly AEPS 234.

PLSC 240. Commercial Seed Production. 4 units  
Term Typically Offered: SP  
Prerequisite: PLSC 120.  

Production of field and vegetable seed. Seed technology, germination, quality control, seed enhancement, storage and handling of seed, and seed laws. Field trip to a seed conditioning/seed enhancement facility required. 3 lectures, 1 laboratory. Formerly AEPS 240.

PLSC 244. Precision Farming. 4 units  
Term Typically Offered: W  
Prerequisite: One of the following: PLSC 133, PLSC 190, PLSC 260, BRAE 237, or BRAE 239.  

Precision agriculture applications. Integrating GIS, GPS, and remote sensing technologies with site-specific farming practices to optimize agricultural productivity. Field trip required. 3 lectures, 1 laboratory. Crosslisted as BRAE/PLSC 244.

PLSC 245. Horticultural Production Techniques. 4 units  
Term Typically Offered: F  
Sustainability Focused  
Applied principles of plant growth in relation to the production horticulture industry. Emphasis on container media, fertilizing practices, irrigation, plant growth regulators, and miscellaneous growing structures. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 245.

PLSC 270. Selected Topics. 1-4 units  
Term Typically Offered: TBD  
Prerequisite: Open to undergraduate students and consent of instructor.  

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures. Formerly AEPS 270.

PLSC 304. Introduction to Plant Breeding. 4 units  
Term Typically Offered: W, SP  
Prerequisite: PLSC 120 and STAT 218. Recommended: one of the following: PLSC 132, PLSC 190, PLSC 230, PLSC 245, PLSC 250, or PLSC 232/233.  

Principles of qualitative and quantitative genetics useful in the development of new plant varieties. Procedures for the creation of genetic variability, testing procedures, and selection schemes for development of improved plant types. 4 lectures. Formerly AEPS 304.

PLSC 312. Environmental Horticulture Enterprise Project II. 2 units  
Term Typically Offered: F, W, SP  
CR/NC  
Prerequisite: Consent of instructor.  

Field experience in environmental horticulture. Selection and completion of a management/production project under faculty supervision. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 312.

PLSC 313. Agricultural Entomology. 4 units  
Term Typically Offered: F  
Prerequisite: PLSC 120 or BOT 121; and one of the following: CHEM 110 or CHEM 127.  

The science of entomology as it relates to insects of importance in agriculture. Focus on the biology, ecology and identification of insects and mites important to California horticulture, field crops and landscapes. 3 lectures, 1 laboratory. Formerly AEPS 313.

PLSC 315. Principles of Organic Crop Production. 4 units  
Term Typically Offered: F, SP  
2020-21 or later: Upper-Div GE Area B  
2019-20 or earlier catalog: GE Area B5, B6, or B7  
Sustainability Focused  
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).  

Origins, application, regulation and technology of organic crop production. Theoretical and practical issues surrounding organic crop production from a cross-disciplinary perspective. Topics include the history of the organic movement; current regulation and certification; and field management practices and technologies. Features industry guest lecturers. Field trip required. 3 lectures, 1 activity. Crosslisted as AG/PLSC 315. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog). Formerly AEPS/AG 315.
PLSC 321. Weed Biology and Management. 4 units
Term Typically Offered: F, SP
Prerequisite: PLSC 120 or BOT 121.

Weed ecology, biology, and implications for management. Identification of weedy and invasive plant species in annual agricultural, perennial semi-managed, range, aquatic, and forest ecosystems, to elucidate weaknesses and strengths in order to facilitate vegetation management. Organic, cultural, biological, mechanical, and chemical methods and their integrated pest management (IPM) uses. 3 lectures, 1 laboratory. Formerly AEPS 321.

PLSC 323. Plant Pathology. 4 units
Term Typically Offered: F, W, SP
Prerequisite: BIO 162 or BOT 121.

Comprehensive study of the causes and effects of diseases of plants. Designed to lead to an understanding of plant pathology, and modern methods to control plant disease. 2 lectures, 2 activities. Crosslisted as BOT/PLSC 323. Formerly AEPS/BOT 323.

PLSC 327. Vertebrate Pest Management. 4 units
Term Typically Offered: W
Prerequisite: Junior standing.

Vertebrate pests injurious to crops, livestock, forest products, wildlife, stored products and humans. Life habits, identification, control methods, and materials. Related laws and regulations. 3 lectures, 1 laboratory. Formerly AEPS 327.

PLSC 329. Plants, Biotechnology, and the Media. 4 units
Term Typically Offered: F, W
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: PLSC 120, BIO 111, BIO 114, BIO 161, or BOT 121.

Agriculture as applied biology and its impact on civilization. Application of technology to increase the efficiency of food production. Genetics and biotechnology; culminating in an assessment of genetically engineered foods, the myths, the controversy, the science. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog). Formerly AEPS 329.

PLSC 331. Advanced Viticulture - Fall. 4 units
Term Typically Offered: F, SU
Prerequisite: PLSC 232 or WVIT 233.

Advanced viticulture theory and practice, with an emphasis on fall season activities. Identification of rootstocks, wine and table grapes, species taxonomy and diversity, and breeding for grapevine improvement. Field trips may be required. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as PLSC/WVIT 331. Formerly AEPS/WVIT 331.

PLSC 332. Landscape Contracting. 4 units
Term Typically Offered: TBD
Prerequisite: PLSC 126 and PLSC 127.

Practices in supervising personnel and applying standard techniques in landscape construction. Cost finding and estimating for landscape trades. 3 lectures, 1 laboratory. Formerly AEPS 332.

PLSC 333. Greenhouse Vegetable Production. 2 units
Term Typically Offered: F
Prerequisite: PLSC 120; CHEM 127; and SS 221.

Development, practices, history, and future of crop production in greenhouses. Research applications, commercial applications, production problems, marketing, and economics. Special emphasis on growing transplants in greenhouses and use of nutrient solutions. Field trips to a commercial greenhouse operation and/or analysis lab required. 2 activities. Formerly AEPS 333.

PLSC 334. Greenhouse Vegetable Enterprise Project. 2 units
Term Typically Offered: W
CR/NC
Sustainability Related
Prerequisite: PLSC 333.

Hands-on experience in the production, management and marketing of a variety of hydroponically-grown, greenhouse vegetables. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 334.

PLSC 336. Advanced Viticulture - Winter. 4 units
Term Typically Offered: W
Prerequisite: PLSC 232 or WVIT 233; and PLSC/WVIT 331.

Advanced viticulture theory and practice with emphasis on winter season activities. Pruning to influence vine balance, productivity, training and trellising systems, vineyard establishment, cover cropping and weed management. Field trips required. 3 lectures, 1 laboratory. Crosslisted as PLSC 336/WVIT 332. Formerly AEPS 336/WVIT 332.

PLSC 337. Advanced Viticulture - Spring. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 232 or WVIT 233; and PLSC/WVIT 331.

Advanced viticulture theory and practices with emphasis on spring activities. Vine source/sink relations, factors impacting yield and berry composition, the role environmental conditions on vine physiology, and canopy management. Field trips required. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as PLSC 337/WVIT 333. Formerly AEPS 337/WVIT 333.

PLSC 339. Internship in Horticulture and Crop Science. 1-12 units
Term Typically Offered: F, W, SP, SU
CR/NC
Prerequisite: Consent of instructor.

Selected Plant Sciences students will spend up to 12 weeks with an approved agricultural/horticultural firm off-campus engaged in plant production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Degree credit limited to 6 units. Credit/No Credit grading only. Formerly AEPS 339.

PLSC 340. Principles of Greenhouse Environment. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 245.

Analysis of problems and practices affecting the contemporary commercial horticulturist. Analysis and operation of greenhouses and related equipment stressing the effect of environment on plant growth. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 340.
**PLSC 341. Cut Flower Production. 4 units**  
Term Typically Offered: F  
Prerequisite: PLSC 120.

Production of cut flowers and other fresh florists' commodities in greenhouses and outdoors. Preparation and scheduling of such commodities for major markets. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 341.

**PLSC 342. Potted Plant Production. 4 units**  
Term Typically Offered: W  
Prerequisite: PLSC 245.

Production of major commercial flowering potted plants in greenhouses and outdoors. Preparation and scheduling of potted flowering greenhouse crops for major markets. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 342.

**PLSC 343. Turfgrass Management. 4 units**  
Term Typically Offered: TBD  
Prerequisite: PLSC 120 or BOT 121; and SS 120 or SS 121.

Turfgrass species and uses. Principles of turfgrass physiology and communities under different environments. Overview of procedures and equipment for propagation, mowing, irrigation, fertilization, aerification, and pest control. 3 lectures, 1 laboratory. Formerly AEPS 343.

**PLSC 350. Abiotic Plant Problems. 4 units**  
Term Typically Offered: W, SP  
Prerequisite: PLSC 120 or BOT 121.

Diagnosis of plant physiological disorders associated with environmental and nutritional stresses. Emphasis on the systematic inquiry process and contrasting abiotic and biotic stress. Lab includes application of various diagnostic instruments, analysis of test results, and treatment recommendations. 3 lectures, 1 laboratory. Formerly AEPS 350.

**PLSC 351. Experimental Techniques and Analysis. 4 units**  
Term Typically Offered: W  
Prerequisite: Junior standing and MATH 118 or equivalent, and STAT 218.

Principal experimental designs used in agriculture and methods of statistical analysis of data collected from each. Statistical software. Field practice in planning and layout of typical experiments. 3 lectures, 1 laboratory. Formerly AEPS 351.

**PLSC 355. Citrus and Avocado Fruit Production. 4 units**  
Term Typically Offered: SP  
Prerequisite: PLSC 120 or PLSC 250.

World citrus and avocado production and marketing. Orchard management techniques. Relationship of environment to species, cultivar, and rootstock selection. Field trip to a major California production area required. 3 lectures, 1 laboratory. Formerly AEPS 355.

**PLSC 360. Nut Crops Production. 4 units**  
Term Typically Offered: TBD  
Prerequisite: PLSC 132.

California nut crop production, focusing on almond, walnut and pistachio. Orchard establishment and management techniques. Environmental, physiological and biological factors affecting growth and production. 3 lectures, 1 laboratory. Formerly AEPS 360.

**PLSC 381. Native Plants for California Landscapes. 4 units**  
Term Typically Offered: SP  
Prerequisite: BIO 114 or BOT 121; and junior standing.

Survey of California flora with emphasis on landscape use and potential. Plant recognition, identification, propagation and culture. Utilization of native plants in landscape design and habitat restoration. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 381.

**PLSC 400. Special Problems for Advanced Undergraduates. 1-4 units**  
Term Typically Offered: FW,SP,SSU  
Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total degree credit limited to 4 units, with a maximum of 4 units per quarter. Report required. Formerly AEPS 400.

**PLSC 406. Advanced Weed Management. 4 units**  
Term Typically Offered: W  
Prerequisite: PLSC 321.

Advanced coverage of sustainable weed and invasive plant management technologies. Concepts include environmental fates, plant metabolism, ecology and biology of weeds, and mechanisms of action of herbicides. Plant biotechnology as it relates to herbicide resistance in crops and weeds. 4 lectures. Formerly AEPS 406.

**PLSC 410. Crop Physiology. 4 units**  
Term Typically Offered: SP  
Prerequisite: PLSC 120 or BIO 263; BIO 162 or BOT 121.

Ecological and physiological factors associated with the production of crop plants. Physiological and biochemical processes that elucidate the mechanisms of whole plant performance and responses to the environment. 4 lectures. Formerly AEPS 410.

**PLSC 414. Grape Pest Management. 4 units**  
Term Typically Offered: F  
Prerequisite: PLSC 232 or WVIT 233; PLSC 313; BOT/PLSC 323.

Comprehensive survey of major grape pests including diseases, insects, weeds, vertebrates, and nematodes. Identification and biology of grape pests and natural enemies, monitoring, and integrated pest management (IPM) strategies, including cultural, biological, and chemical controls. Guest lectures. 3 lectures, 1 activity. Crosslisted as PLSC/WVIT 414. Formerly AEPS/WVIT 414.

**PLSC 420. Organic Crop Production Systems. 4 units**  
Term Typically Offered: W  
Prerequisite: PLSC 120 or BOT 121; SS 120; and junior standing.

Systems approach to crop management, soil fertility and plant nutrition, and crop and pest management including current regulations and modern technologies implemented in organic crop production. Intended for students with a background in the plant sciences. Field trip required. 3 lectures, 1 activity. Formerly AEPS 420.
PLSC 421. Postharvest Technology of Horticultural Crops. 4 units
Term Typically Offered: SP
Prerequisite: Junior standing.
Respiration, ethylene, ripening and senescence; modified atmosphere packaging, controlled atmosphere storage, packinghouses and transportation; survey of postharvest techniques to maximize commodity shelf-life. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 421.

PLSC 424. Nursery Crop Production. 4 units
Term Typically Offered: W
Prerequisite: PLSC 124.
Comprehensive and historical overview of the nursery industry. Types of wholesale nurseries and their products. Plant production systems, scheduling, and marketing. Emphasis on medium to large woody plants and deciduous field-grown ornamental trees and shrubs in the western U.S. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 424.

PLSC 425. Arboriculture. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 123, PLSC 233, and PLSC 234 or NR 208 for FFS majors.
Theory and practice for the care and management of ornamental trees. Selection, planting, establishment, maintenance of specimen trees. Professional use of ropes and safety equipment. Tree evaluation, scheduling cultural practices, bracing, cabling, specialty hand and power equipment operation, safety regulations. 2 lectures, 2 laboratories. Formerly AEPS 425.

PLSC 427. Disease and Pest Control Systems for Ornamental Plants. 4 units
Term Typically Offered: W
Prerequisite: PLSC 120, PLSC 313, PLSC 321, and BOT/PLSC 323.
Recognition, prevention and control of diseases, insect/mite pests and weeds that impact commercial ornamental plantings. Integrated pest management strategies presented including biological, cultural, and safe and proper pesticidal controls. Laboratory emphasizes monitoring, problem-solving and application of appropriate pest control measures. 2 lectures, 2 activities. Formerly AEPS 427.

PLSC 428. Advances in Plant Pathology. 4 units
Term Typically Offered: F
Prerequisite: BOT/PLSC 323 and STAT 218.
Discussions of disease development, effect of pathogens on plant function, breeding for disease resistance, plant defense mechanisms, epidemiology and disease management, diagnosis techniques, and career opportunities in the field of Plant Pathology. 3 lectures, 1 laboratory. Formerly AEPS 428.

PLSC 431. Insect Pest Management. 4 units
Term Typically Offered: SP
Prerequisite: PLSC 313.
Principles of insect and mite pest management, including integrated pest management (IPM), applications of ecological theory to pest management, cultural, biological and chemical controls, pesticide resistance management, insect and mite monitoring, biotechnology applications, pesticide laws and regulations, pest control advisor and qualified applicator licensing and certification. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 431.

PLSC 432. Specialized Operations for Golf Courses and Athletic Fields. 4 units
Term Typically Offered: TBD
Prerequisite: PLSC 343.
Advanced maintenance and operation of golf course facilities and athletic field complexes. Specialized turf establishment and maintenance, environmental concerns, finance and personnel management, and professional development. Field trip required. Not open to students with credit in PLSC 430. 3 lectures, 1 laboratory. Formerly AEPS 432.

PLSC 437. Park and Public Space Management. 4 units
Term Typically Offered: TBD
Prerequisite: Junior standing.
Management and maintenance of private and public parks, arboreta, botanical gardens and recreational areas. Maintenance personnel management, safety and liability issues. Field trips required. 3 lectures, 1 laboratory. Formerly AEPS 437.

PLSC 441. Biological Control for Pest Management. 4 units
Term Typically Offered: F
Prerequisite: PLSC 313.
Control of arthropods, weeds and vertebrates to include history of biocontrol; biology of beneficial arthropods; methods of introduction, augmentation and conservation; and case studies. Identification of beneficial arthropods to appropriate taxonomic level. Technology, laws and regulations governing use of biocontrol agents. Field trips to insectaries, quarantine facilities and/or crop production areas. 3 lectures, 1 laboratory. Formerly AEPS 441.

PLSC 445. Cropping Systems. 4 units
Term Typically Offered: W
Prerequisite: PLSC 120; or BOT 121 and SS 120 or SS 121; or graduate standing.
Classification and description of agricultural systems of the world. Cropping systems as land management plans. Systems approaches to improvement of agricultural situations. Consideration of human factors and the agroecosystem in efforts to create a more sustainable agriculture. Field trip required. 3 lectures, 1 activity. Formerly AEPS 445.

PLSC 450. Current Issues in the Strawberry Industry. 2 units
Term Typically Offered: SP
Sustainability Focused
Prerequisite: PLSC 120. Corequisite: BOT 121.
Current issues in the California strawberry industry. Varied topics related to production techniques, pest management, labor, food safety, water quality, breeding, postharvest handling, automation, marketing, processing, and organics. Field trip required. Total credit limited to 4 units. 2 seminars. Formerly AEPS 450.
PLSC 461. Senior Project I. 2 units
Term Typically Offered: F, W, SP
Prerequisite: Junior standing; completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); and STAT 218.

Initial information research for project definition and development. Projects are typical of problems which graduates must solve in their fields of study or employment. Project results are presented in PLSC 462. Contract drawn up with approval of advisor. 2 lectures. Formerly AEPS 461.

PLSC 462. Senior Project II. 2 units
Term Typically Offered: F,W,S,SP
Prerequisite: Consent of instructor.

Continuation of Senior Project development. Write-up of rough draft and formal draft of project. Completion of formal written report under advisor supervision. Minimum 60 hours. Formerly AEPS 462.

PLSC 470. Selected Advanced Topics. 1-4 units
Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures. Formerly AEPS 470.

PLSC 471. Selected Advanced Laboratory. 1-4 units
Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories. Formerly AEPS 471.

PLSC 500. Individual Study in Horticulture and Crop Science. 1-6 units
Term Typically Offered: F,W,S,SP
Prerequisite: Consent of instructor.

Advanced independent study planned and completed under the direction of a member of the Plant Sciences faculty. Total credit limited to 6 units. Formerly AEPS 500.

PLSC 539. Graduate Internship in Horticulture and Crop Science. 1-9 units
Term Typically Offered: F,W,S,SP
Prerequisite: Consent of instructor.

Application of theory to the solution of problems of agricultural production or related business in the fields of horticulture and crop science. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units. Formerly AEPS 539.

PLSC 571. Selected Topics Laboratory in Horticulture and Crop Science. 1-4 units
Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 laboratories. Formerly AEPS 571.

PLSC 575. Applied Systematics for Agriculture. 4 units
Term Typically Offered: TBD
Prerequisite: Graduate standing. Recommended: a course in basic entomology, plant pathology, and weed science.

The application of evolutionary, phylogenetic, taxonomic and biogeographic principles as they pertain to current agricultural issues in the US. Attention is given to invasive species and their impact on California’s agricultural industry. The course focus is insects, but invasive plants and microorganisms are also addressed. 4 seminars. Formerly AEPS 575.

PLSC 581. Graduate Seminar in Crop/Fruit Production. 3 units
Term Typically Offered: W
Prerequisite: Graduate standing.

Group study of current problems, trends and research results pertaining to production or marketing of field, vegetable or fruit crops. 3 seminars. Formerly AEPS 581.

PLSC 596. Thesis in Crop Science. 1-9 units
Term Typically Offered: F,W,SP,SU
Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in Crop Science. Thesis will include problem identification, significance, methods, data analysis, and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Total credit limited to 9 units. Formerly AEPS 596.

PLSC 597. Thesis in Environmental Horticulture Science. 1-9 units
Term Typically Offered: F,W,SP
Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in environmental horticulture. Thesis will include problem identification, significance, methods, data analysis and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Total credit limited to 9 units. Formerly AEPS 597.

PLSC 598. Thesis in Fruit Science. 1-9 units
Term Typically Offered: F,W,SP
Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in Fruit Science. Thesis will include problem identification, significance, methods, data analysis, and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Total credit limited to 9 units. Formerly AEPS 598.
PLSC 599. Thesis in Plant Protection Science. 1-9 units
Term Typically Offered: F, W, SP
Prerequisite: Graduate standing and consent of instructor.

Systematic research of a topic in plant protection science, including weed science, entomology, plant pathology, nematology or vertebrate management. Thesis to describe the problem and its significance, methodology, results, data analysis, discussion and conclusion. Enrollment required every quarter in which facilities are used or advisement received. Total credit limited to 9 units. Formerly AEPS 599.
