CONSTRUCTION MANAGEMENT (CM)

CM Courses

CM 102. Introduction to Construction Management. 2 units
Term Typically Offered: F, W, SP
Introduction to the fundamental concepts and overview of the essential elements associated with the construction profession, to include: construction trends, ethics, safety and health issues, and professional practice methods. 2 lectures.

CM 113. Construction Materials and Assemblies. 2 units
Term Typically Offered: F, W, SP
Recommended: CM 102.
Exploration of the various materials, assemblies, and processes used and applied in the building construction process. Includes presentation, discussion, analysis, study and research of construction materials and assemblies. 2 lectures.

CM 114. Construction Materials and Assemblies Lab. 2 units
Term Typically Offered: F, W, SP
Exploration of the various materials, assemblies, and processes used and applied in the building construction process. Includes presentation, discussion, analysis, study and research of construction materials and assemblies. 2 laboratories.

CM 115. Fundamentals of Construction Management. 6 units
Term Typically Offered: F, W, SP
Prerequisite: ARCE 106 or CM 113; MATH 141; and PHYS 141.
Production of drawings and specifications for residential and light commercial construction. Integration of scheduling, estimating, codes, and contracts with a project based approach. Manual drawing techniques and computer aided drafting with building information modeling develop visualization skills for architectural systems. 4 laboratories, 2 activities.

CM 214. Residential Construction Management. 5 units
Term Typically Offered: F, W, SP
Prerequisite: CM 115, PHYS 132 or PHYS 142, or CHEM 124. Corequisite: CM 232.
Materials, methods, and techniques associated with residential and light commercial construction operations. Topics include shallow foundations, timber and masonry framing, roofing, and exterior and interior finishes. Scheduling, estimating, and construction contracts are integrated into a project based approach. 3 laboratories, 2 activities.

CM 232. Evaluation of Cost Alternatives. 3 units
Term Typically Offered: F, W, SP
Prerequisite: MATH 142 or MATH 182.
Basic principles of economic evaluations using fundamental concepts of time value of money to compare cost alternatives related to construction, design, and real property development. 3 lectures.

CM 239. Construction Surveying. 4 units
Term Typically Offered: F, W, SP
Prerequisite: MATH 119 or equivalent.
Theory and practice of plane surveying with an emphasis on construction applications. Topics include property use and care of survey equipment and instruments, distance measurement, leveling, angular measurement, construction layout, basic roadwork, and as-built surveys. 3 lectures, 1 laboratory.

CM 280. Building Information Modeling. 2 units
Term Typically Offered: F, W, SP
Prerequisite: CE 113 or CM 115.
Use of building information modeling software to emphasize residential, commercial, and heavy civil assembly methods and techniques. BIM drafting applications integrated with construction materials, details, and assemblies supporting the understanding of the construction building process. Course may be offered in classroom-based, online, or hybrid format. 2 activities.

CM 310. Construction Means and Methods. 4 units
Term Typically Offered: F, SP
Prerequisite: CM 113 or CE 259 or ARCE 106.
Construction means, methods, and techniques related to the built environment including residential, commercial, heavy civil and HVACR construction. Focus on the major construction material assemblies and systems with an emphasis on constructability, best practices, and application. Field trips required. 4 lectures.

CM 313. Commercial Construction Management. 5 units
Term Typically Offered: F, W, SP
Prerequisite: ARCE 212 and CM 214. Corequisite: CM 280 and CM 334.
Materials, methods, and techniques associated with large commercial and institutional construction operations. Topics include building systems analysis of foundations, waterproofing, structural framing, exterior cladding, and finishes. Scheduling, estimating, and construction contracts are integrated into a project based approach. 3 laboratories, 2 activities.

CM 314. Heavy Civil Construction Management. 5 units
Term Typically Offered: F, W, SP
Prerequisite: CM 239 or BRAE 239; CM 313 or CM/CE 371.
Materials, methods, and techniques associated with civil engineering projects and heavy construction operations. Topics include tunnel, bridge, dam, and road construction; equipment selection; and temporary structures. Scheduling, estimating, and construction contracts are integrated into a project based approach. 3 laboratories, 2 activities.
CM 317. Sustainability and the Built Environment. 4 units
Term Typically Offered: F,W,SP,SU
Prerequisite: CM 214 or CM 313. 
Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.
Individual investigation, research, studies or surveys of selected problems. Total credit limited to 6 units, with a maximum of 4 units per quarter.

CM 411. Specialty Contracting Construction Management. 5 units
Term Typically Offered: F, W, SP
Prerequisite: CM 313.
Materials, methods, and techniques associated with mechanical, electrical, and plumbing systems. Topics include heating, ventilating, air conditioning, power distribution, grounding, lighting, communication, fire detection/protection, and plumbing. Integration of scheduling, estimating, and construction subcontracts with a project based approach. 3 laboratories, 2 activities.

CM 415. Integrated Project Delivery. 4 units
Term Typically Offered: TBD
Prerequisite: Third-year standing.
Team based collaborative effort to analyze and evaluate the unique interdisciplinary challenges associated with coordinating and integrating the design and construction processes to deliver a project with respect to the design, budget, schedule, quality, and performance expectations of a client. Not open to students with credit in CM 450. 4 laboratories.

CM 420. Service / Experiential Learning. 1-6 units
Term Typically Offered: SP
Prerequisite: Consent of instructor.
Individual investigation, research, studies or surveys of selected problems. Total credit limited to 6 units, with a maximum of 4 units per quarter.
CM 422. Professional Preparation. 1-6 units
Term Typically Offered: F, W, SP
Prerequisite: Third-year standing.

Professional practice related to the construction management industry. Goals and objectives achieved through analysis, study, and preparation for a particular professional practice. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 1 to 6 activities.

CM 423. Construction Materials / Assemblies. 1-6 units
Term Typically Offered: TBD
Prerequisite: Third-year standing.

Various materials and assemblies related to construction process. Goals and objectives achieved through analysis, study, and research of a particular construction material and/or assembly. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 6 activities.

CM 424. Construction Technology. 1-6 units
Term Typically Offered: SU
Prerequisite: Third-year standing.

Technology related to construction management education and the construction industry. Goals and objectives achieved through analysis, study, and research of a particular construction technology. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 6 activities.

CM 425. Sustainability and Environment. 1-6 units
Term Typically Offered: TBD
Sustainability Focused
Prerequisite: Third-year standing.

Sustainable and environmental issues related to the construction industry. Goals and objectives achieved through analysis of a particular construction related sustainable and/or environmental issue. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 1 to 6 activities.

CM 426. International Construction Studies. 1-6 units
Term Typically Offered: TBD
Prerequisite: Third-year standing.

Exploration of international construction studies through several potential teaching techniques, including field trips to countries overseas, research and case studies of companies and projects, and management skills and leadership as they relate to international construction. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 6 activities.

CM 427. Heavy Civil Projects and Equipment. 4 units
Term Typically Offered: SP
Prerequisite: CM 314.

Heavy civil projects logistics, construction, operations, planning, management, workflow and sequencing, equipment management, fleet configuration and maintenance, equipment productivity and cost optimization. 2 lectures, 2 laboratories. Crosslisted as CE/CM 437.

CM 443. Management of the Construction Firm. 3 units
Term Typically Offered: F, W, SP
Prerequisite: CM 334; CM 335; and CM 413.

Applications of strategic management techniques and business strategy for managing and long-range planning of the construction firm. 3 activities.

CM 450. Integrated Project, Design and Program Management. 5 units
Term Typically Offered: F, W, SP
Prerequisite: STAT 251 or STAT 312, CM 313 and CM 334.

Evaluation of roles and relationships of owner, designer, and construction professionals over project life cycles. Modeling, conceptual estimating, lean scheduling, contract selection, integrated delivery, design management, program management, and influential leadership strategies and techniques. Not open to students with credit in CM 415. Course may be offered in classroom-based, online, or hybrid format. 3 laboratories, 2 activities.

CM 460. Senior Project Methodology. 2 units
Term Typically Offered: F, W, SP
Prerequisite: CM 313; junior standing; Construction Management majors only.

Introduction to senior project processes, timelines, requirements, and best practices including topic selection, literature review, methodology, and paper formatting. 2 lectures.

CM 461. Senior Project I. 1 unit
Term Typically Offered: F, SP
Prerequisite: CM 460 and consent of project advisor. See department for additional guidelines and requirements.

Selection and completion of a comprehensive project under faculty supervision. Problems to involve the student's technical and creative skills. Student proposal must be submitted and approved by project advisor prior to registration for course. Construction and team projects encouraged.

CM 462. Senior Project II. 1 unit
Term Typically Offered: F, W, SP
Prerequisite: CM 460 and consent of project advisor. See department for additional guidelines and requirements.

Selection and completion of a comprehensive project under faculty supervision. Problems to involve the student's technical and creative skills. Student proposal must be submitted and approved by project advisor prior to registration for course. Construction and team projects encouraged.
CM 463. Senior Project: Professional Practice for Constructors. 3 units
Term Typically Offered: TBD
Prerequisite: CM 413. Corequisite: CM 443.
Practical application of construction management theory and practice solving problems related to the built environment. 3 laboratories.

CM 470. Selected Advanced Topics. 1-4 units
Term Typically Offered: TBD
Prerequisite: Consent of instructor.
Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CM 475. Real Property Development Principles. 4 units
Term Typically Offered: F, SP
Prerequisite: Minimum junior standing.
Development process and its major actors: investors, developers, government agencies, environmental and local stakeholders; their development roles, objectives, approaches. Basics of urban markets and economics, financing, regulation, public planning; value added, contractual, environmental and community context factors. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

CM 480. Preconstruction Integration and Planning. 2 units
Term Typically Offered: TBD
Prerequisite: CM 313.
Examination of the role of preconstruction services, team integration, and joint design planning in several Integrated Project Delivery (IPD) approaches. Various tools and techniques associated with preconstruction services and design planning from the proposal stage through the design stages of a project. 2 activities.

CM 485. Cooperative Education Experience. 1-6 units
Term Typically Offered: F, W, SP
CR/NC
Prerequisite: Consent of instructor.
Full-time work experience in an area directly related to the construction industry for 3 months. Positions are paid and usually require relocation and registration in course for one quarter. Registration in course is required at start of work experience. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. May be repeated for credit. Major credit limited to 6 units; total credit limited to 12 units. See department for additional requirements.

CM 495. Cooperative Education Experience. 12 units
Term Typically Offered: TBD
CR/NC
Prerequisite: Consent of instructor.
Full-time work experience in an area directly related to the construction industry for 6 months. Positions are paid and usually require relocation for two consecutive quarters. Registration in course is required at start of work experience. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. May be repeated for credit. Major credit limited to 6 units; total credit limited to 24 units. See department for additional requirements.

CM 510. Principles of Integrated Facility Management. 4 units
Term Typically Offered: TBD
Prerequisite: Consent of instructor.
Examination of the facility management profession and all functions associated with it, including strategic planning, financial planning, budgeting, project management, operations and maintenance, sustainability, and emergency preparedness, and how those functions interface with the overall goals of the business enterprise. Course offered online only. 4 lectures.

CM 521. Construction Cost Estimating and Work Procurement. 4 units
Term Typically Offered: TBD
Prerequisite: Consent of program coordinator.
Examination of the construction discipline of cost estimating and pre-construction activities, emphasizing both the core and higher functions associated with types of estimates, measuring and pricing, bidding procedures and strategies, procurement, pre-construction services, budget, and cost control analysis. 4 lectures.

CM 522. Construction Planning, Scheduling, and Impact Analysis. 4 units
Term Typically Offered: TBD
Prerequisite: Consent of program coordinator.
Examination of the construction discipline of planning, scheduling, management, and control relating to both core and higher functions associated with network diagram analysis, CPM scheduling, project diagnostics, short interval, resource loaded, pull scheduling, forecasting, and earned value management techniques. 4 lectures.

CM 523. Construction Contracts and Law. 4 units
Term Typically Offered: TBD
Prerequisite: Consent of program coordinator.
Examination of the discipline of law and contracts as they relate to the construction industry, including both the core and higher functions associated with the construction process, business organization, employment responsibilities, liability, damages, claims, dispute resolution, and risk management. 4 lectures.

CM 524. Construction Project Management and Control. 4 units
Term Typically Offered: TBD
Prerequisite: Consent of program coordinator.
Examination of the discipline of construction project management and control relating to both the core and higher functions associated with the construction process, pre-construction services, and management in the areas of safety, quality, resource, risk, schedule, budget, changes, and value. 4 lectures.
CM 525. Construction Workforce, Productivity, and Safety. 4 units
Term Typically Offered: TBD
Prerequisite: Consent of program coordinator.

Examination of the disciplines of workforce productivity and safety as they relate to the construction industry, including both the core and higher functions associated with field personnel management, construction operations, lean construction techniques, equipment utilization, productivity, and OSHA regulations. 4 lectures.

CM 570. Selected Advanced Topics in Construction Management. 4 units
Term Typically Offered: TBD
Prerequisite: Graduate standing or consent of instructor.

Directed study of selected topics in Construction Management. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

CM 571. Selected Advanced Laboratory. 1-4 units
Term Typically Offered: TBD
Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.
