

INTERDISCIPLINARY STUDIES (BA)

Offered at: San Luis Obispo Campus

The B.A. in Interdisciplinary Studies aligns with Cal Poly's "Learn by Doing" mission and reflects a core value of the university by promoting interdisciplinary inquiry. The major is designed to empower students and challenges them to think critically about the assumptions and strategies underlying disciplines as part of developing their own interdisciplinary research or creative projects. Interdisciplinarity is about making creative links across boundaries, synthesizing wide-ranging perspectives, and challenging rigid classifications. The curricular structure for the IS degree provides an integrated, interdisciplinary, and individualized approach to student education. The program features a small number of core courses within the major. The goal of these core courses is to challenge students to be self-conscious and reflective about the integration of their disciplinary and interdisciplinary learning experiences. The bulk of the IS curriculum requires students to take courses across more than one discipline from multiple departments. But the structure of their course choices asks them to analyze, synthesize and harmonize links between disciplines, as opposed to staying within the boundaries of each discipline. This approach to curricular structure emphasizes a truly interdisciplinary, rather than multidisciplinary, educational experience. It also leads to a more individualized course of study that values an intentional, student-driven path through the program's curriculum.

Concentrations

Ethics, Law, and Social Justice

Offered at: San Luis Obispo Campus

This concentration is designed to foster critical inquiry into the dynamic interrelationships between ethics, legal institutions and social justice. Students will examine how historical and contemporary social forces influence the legal system and how law affects society. They will analyze and evaluate how personal and societal value systems, as well as identities and their intersections shape attitudes towards and treatment within the legal and judiciary systems.

Global Citizenship and Social Sustainability

Offered at: San Luis Obispo Campus

Students in this concentration are challenged to conceptualize, understand and analyze issues of sustainability from social, cultural, and environmental perspectives in an increasingly globalized and interconnected world. The concentration asks students to reflect on the idea that long-term sustainability requires attention to social equity, cultural preservation, and economic development as well as to environmental stewardship.

Health and Society

Offered at: San Luis Obispo Campus

Students pursuing this concentration will examine the social and societal dimensions of mental and physical health. They will investigate how gender, race, social class, sexuality and ethnicity shape health in both national and global contexts, as well as the political, ethical, environmental, cultural, and social influences on health and health institutions.

Science, Technology, and Society

Offered at: San Luis Obispo Campus

In this concentration students investigate and analyze the complex relationships between science, technology, and society in an increasingly technical world. Students will identify, assess and develop solutions to complex problems transcending the traditional divide between the humanities and social sciences and scientific, technical and professional fields.

Visual, Media, and Cultural Studies

Offered at: San Luis Obispo Campus

Students pursuing this concentration will enhance their critical grasp of how art, media, and related forms of cultural production simultaneously shape and are shaped by our social and political worlds. They will apply interdisciplinary approaches to articulate, contextualize, and analyze how historical and contemporary developments in visual, media, and cultural studies have not only transformed individual experiences but also social relations and systems of power, privilege, and oppression. Gaining critical understanding of these complex and rapidly changing contexts requires the integration of history, theory, and practice with critical engagement from humanistic and social scientific perspectives.

Program Learning Objectives

1. Identify and think critically about the assumptions, strategies, and potential biases underlying discipline-based and interdisciplinary inquiries.
2. Conduct interdisciplinary research and/or engage in creative activities that incorporate and synthesize information, theory, and methodological approaches from more than one discipline in a culturally-competent way.
3. Apply interdisciplinary approaches to understand, contextualize, and propose solutions to complex issues or problems, especially those relating to students' emphasis areas.

4. Communicate effectively both in writing and orally.
5. Collaborate productively in pluralistic settings and with people of diverse experiences, identities, and worldviews.
6. Make reasoned, ethical, and socially responsible decisions.
7. Engage in self-motivated and self-directed learning, in order to become life-long learners.
8. Employ the intellectual and practical skills necessary to create and engage with a more inclusive, just and equitable world.

Degree Requirements and Curriculum

In addition to the program requirements listed on this page, students must also satisfy requirements outlined in more detail in the Minimum Requirements for Graduation (<https://catalog.calpoly.edu/academic-standards-policies/general-requirements-bachelors-degree/#generaleducationtext>) section of this catalog, including:

- 40 units of upper-division courses
- 2.0 GPA
- Graduation Writing Requirements (GWR)
- U.S. Cultural Pluralism (USCP)

Note: No Major or Support courses may be selected as credit/no credit. In addition, no more than 12 units of cooperative or internship courses can count towards your degree requirements
