## **MS NUTRITION**

## **Program Learning Objectives**

After successfully completing the Master of Science in Nutrition, students will be able to:

- 1. Apply fundamental principles of nutrition science in research and required coursework
- 2. Explain, analyze, and interpret fundamental scientific concepts in the specific area of thesis research
- 3. Apply the scientific method to nutrition research through the design, conduct, and defense of a thesis research project
- 4. Apply critical thinking skills to the analysis of published research literature and the design/interpretation of a thesis research project
- 5. Show independent and creative thinking skills in the formulation, design, conduct, and interpretation of nutrition research
- 6. Demonstrate strong written and oral communication skills
- 7. Work productively, respectfully, and professionally as part of a research team and in other group settings
- 8. Exhibit leadership, ethical conduct, and community values

## **Required Courses**

| FSN 516                            | Population Health and Epidemiology                                  | 3  |
|------------------------------------|---------------------------------------------------------------------|----|
| or FSN 531                         | Lipid Metabolism and Nutrition                                      |    |
| FSN 528                            | Biochemical and Molecular Aspects of Human Macronutrient Metabolism | 4  |
| FSN 529                            | Metabolic and Molecular Aspects of Vitamins                         | 2  |
| FSN 530                            | Metabolic and Molecular Aspects of<br>Minerals                      | 2  |
| FSN 582                            | Current Nutrition Research                                          | 3  |
| FSN 599                            | Thesis                                                              | 6  |
| STAT 511                           | Statistical Methods                                                 | 4  |
| Approved Electives                 |                                                                     |    |
| See approved electives list below. |                                                                     | 21 |
| Total units                        |                                                                     | 45 |
