## MS BIOMEDICAL ENGINEERING, SPECIALIZATION IN REGENERATIVE MEDICINE

## **Program Learning Objectives**

- Perform fundamental laboratory skills involved in regenerative medicine research & development.
- 2. Discuss and critically evaluate biomedical primary literature.
- 3. Effectively communicate technical topics to both peer and lay audiences
- Explain the process of biotechnology development & commercialization.
- 5. Describe how research & development efforts are motivated by and impact physician & patient experiences.
- 6. Design and execute independent research projects.

## **Required Courses**

BMED 520	Modeling of Biomedical Systems	4
or BMED 530	Biomaterials	
BMED 505	Biomedical Signal Transduction and Data Acquisition	4
or BMED 515	Introduction to Biomedical Imaging	
STAT 513	Applied Experimental Design and Regression Models	4
or IME 527	Design of Experiments	
BMED 510	Principles of Tissue Engineering	4
BMED 560	Cell Transplantation and Biotherapeutics	2
BMED 561	Cell Transplantation and Biotherapeutics Laboratory	2
BIO/CHEM 475	Molecular Biology Laboratory	3-5
or ASCI 403	Applied Biotechnology in Animal Science	
BIO 534	Principles of Stem Cell Biology	2
ASCI 581	Graduate Seminar in Animal Science	1
BIO 590	Seminar in Biology	1
BMED 563	Biomedical Engineering Graduate Seminar	2
BIO 509	Communicating Biology to General Audiences	1
BIO/ASCI/BMED 583	Research Experience for Regenerative Medicine Students	2
ASCI/BIO/BMED 593	Regenerative Medicine Internship	9
Approved Electives <sup>1</sup>		4
Total units		45

The range of elective units reflects differences in the Molecular Techniques Course options (BIO 475; ASCI 403) and inclusion of BMED 500, such that the total required units for the program are 45.
