SCIENCE CONCENTRATION

The discipline of science is based on laws governing the world around us. Knowledge in this area is generated by development of concepts in matter, motion, and energy in living systems and Earth and space while emphasizing evidence to support claims for its knowledge. This concentration expands on ideas of the branches of science with engagement in the practices to build proficiency and further develop appreciation of the strengths and limitations of science in the real world.

This concentration is aligned to a supplemental authorization in Science that can be added to your future credential. See a concentration advisor for more information.

Students must take at least one 4-unit course at the 300-400 level in the concentration; three courses in the same discipline are recommended.
